NOTE FOR THE DIRECTOR

Bill:

I have received material from DIA and the Services, NSA, NRO, FBI, and Treasury responsive to last Saturday's meeting. Materials include:

1. Statutory authorities;
2. A report on any legislative proposals being made by Community elements;
3. Recommendations to you on the groundrules for security and handling of intelligence documents with the Committees (the FBI's is particularly good);
4. Some succinct examples of intelligence produced and of the value of intelligence to policy judgments (these may have some limited use);
5. General papers listing individual agency's relationship with other Intelligence Community agencies.

You will recall in your own outline of annexes you suggested that each agency might have a specific statement about its missions, functions, etc. A good deal of this material is already available to the Intelligence Community Staff in the PFIAB reports submitted to you for last year. Some are available in submissions provided yesterday. However, you may wish to explain to the USIB your game plan of tabling annexes including a statement from each intelligence agency.

(Dictated but not read)
